**ST.XAVIERS COLLEGE (AUTONOMOUS), PALAYAMKOTTAI**

**STAND-INCUBATION CENTRE REPORT**

Our college has set up an incubation centre under the initiative called LAB TO LAND programme in the Student Training and Action for Neighbourhood Development (STAND) centre which is committed to demonstrate, train and empower the weaker sections of the nearby local communities, especially women self-help groups of STAND adopted villages. The facilities and the equipment were developed with the help of the research grant received from Department of Science and Technology, Government of India for the project entitled 'Socio-economic empowerment of self-help group women in stand adopted villages through compost, biofertilizer and biogas production in Tirunelveli district in Tamil Nadu'. Training is provided on vermicomposting, Azolla production, bio-gas production, Ornamental fish culture, spirulina (Blue green Algae) production and tissue culture of medicinal plants. The students and faculty members of our college have full access to the facilities available in this incubation centre for the purpose of learning and training. Along with the director and the coordinators of STAND centre, the second year undergraduate students, the first year Postgraduate students and faculty members from the respective departments are involved in transferring the skills and knowledge that this incubation centre has developed. The survey of student participation in DST-STAND activities between June 2013 and April 2018 clearly indicates that a total of 5,662 students took part in the village visits and camps, out of which 3,095 were women students and 2,567, were men students.

This incubation centre helps the farmers of the STAND adopted villages in installing vermicompost pit, Azolla tank, Spirulina tank, bio gas plant and bio-fertilizer pit in their own land, backyards or a common space in the village, by giving them hands-on training in both production and marketing of the products. The training workshops were conducted by Dr. John De Britto, Associate Professor of Botany, Dr. S. V. L. Micheal, Associate Professor of Economics and the programme coordinators through video clips, power point presentation and demonstration. Totally, 737 women from STAND adopted villages participated in the awareness and training programme both in the college STAND centre and in their respective villages. On the whole 35 women self-help groups were formed in STAND adopted villages and trained for the production of vermicompost, Azolla, Spirulina, biofertilizer and biogas. Several meetings

were organised to bring together aspiring women entrepreneurs and the bank managers for helping them to avail loans to install the facilities for production and marketing. Thirty one members from women self-help groups were selected for availing loan facility.
